

(a) Congenial imputation

*Rubin's rules: $\approx 95\%$ coverage of β^**

*RW: $\approx 95\%$ coverage of β^**

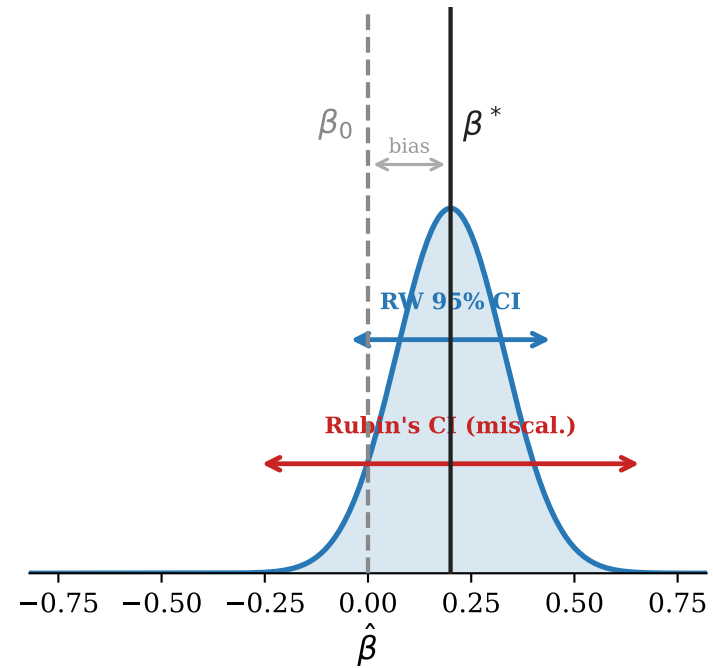

(b) Uncongenial — anti-conservative

Rubin's rules: $< 95\%$ coverage of β^ (too narrow)*

*RW: $\approx 95\%$ coverage of β^**

(c) Uncongenial — conservative

Rubin's rules: $> 95\%$ coverage of β^ (too wide)*

RW: $\approx 95\%$ coverage of β^ ; coverage of β_0 also affected by bias*
